

BONITA ENVIRONMENTAL POLICY

For Bonita, life in all its facts, natural resources and bio-diversity are precious gifts that need to be protected in order to safeguard the quality of existence of man in complete harmony with his natural surroundings. Therefore, it is the Company's Policy :

- To carry out all its production operations in compliance with the applicable Ecuadorian and International Environmental Laws, Rules and Regulations, as well as other agreements signed by the Corporation.
- To secure the continuous improvement in the Corporation's handling of the environment, implementing programs of evaluation, analysis and monitoring in production and development areas, allocation administrative responsibilities that ensure adequate and significant control of environmental impact in all its operations.
- To create and maintain environmental awareness throughout the Corporation, implementing training programs for its entire staff on topics of interest, in order to strengthen knowledge of their responsibilities towards the environment and to improve their attitude towards actions that harm their surroundings.
- To implement all the Environmental Contamination Control and Waste Management measures that are ethically and legally the responsibility of the Corporation, by means of a technically proven and economically viable methodology, in order to guarantee a "clean product" for users at home and overseas.
- To check that this policy is being carried out through regular monitoring, evaluation, and auditing of facilities and processing in order to avoid any adverse impact on the environment and/or human health.
